

# AirBNB

---

## Data Analysis

# 1 - INTRODUCTION

---

## **Title:**

**Analyzing AirBNB Data for European Cities**

## **Objective:**

**To identify AirBNB statistics according to the cities, accommodation preferences and subway distance.**

## **Data Source:**

**Kaggle - AirBNB prices in European Cities(CHRDIM)**

# 2 - OVERVIEW OF DATA

---

**Number of observations:**

**51,707**

**Variables included:**

**'City', 'realSum', 'room\_type', 'room\_shared', 'room\_private',  
'person\_capacity', 'host\_is\_superhost', 'cleanliness\_rating',  
'guest\_satisfaction\_overall', 'bedrooms', 'dist', 'metro\_dist', 'Day'**

**Data cleaning:**

**Duplicates removed, missing values imputed or removed,  
column data types identified and corrected.**

# 3 – DESCRIPTIVE ANALYSIS

---

**Which cities are the most expensive?**

**Most Expensive City:** Amsterdam

**Cheapest City:** Athens

# Average Entire Home/Apt Cost (€) *Weekday*

**Amsterdam, Barcelona and Paris are the most expensive cities among the other cities.**

# Average Private Room Cost (€) *Weekday*

**Barcelona, Amsterdam and Berlin have the highest price drop from entire home/apt category to private room category.**

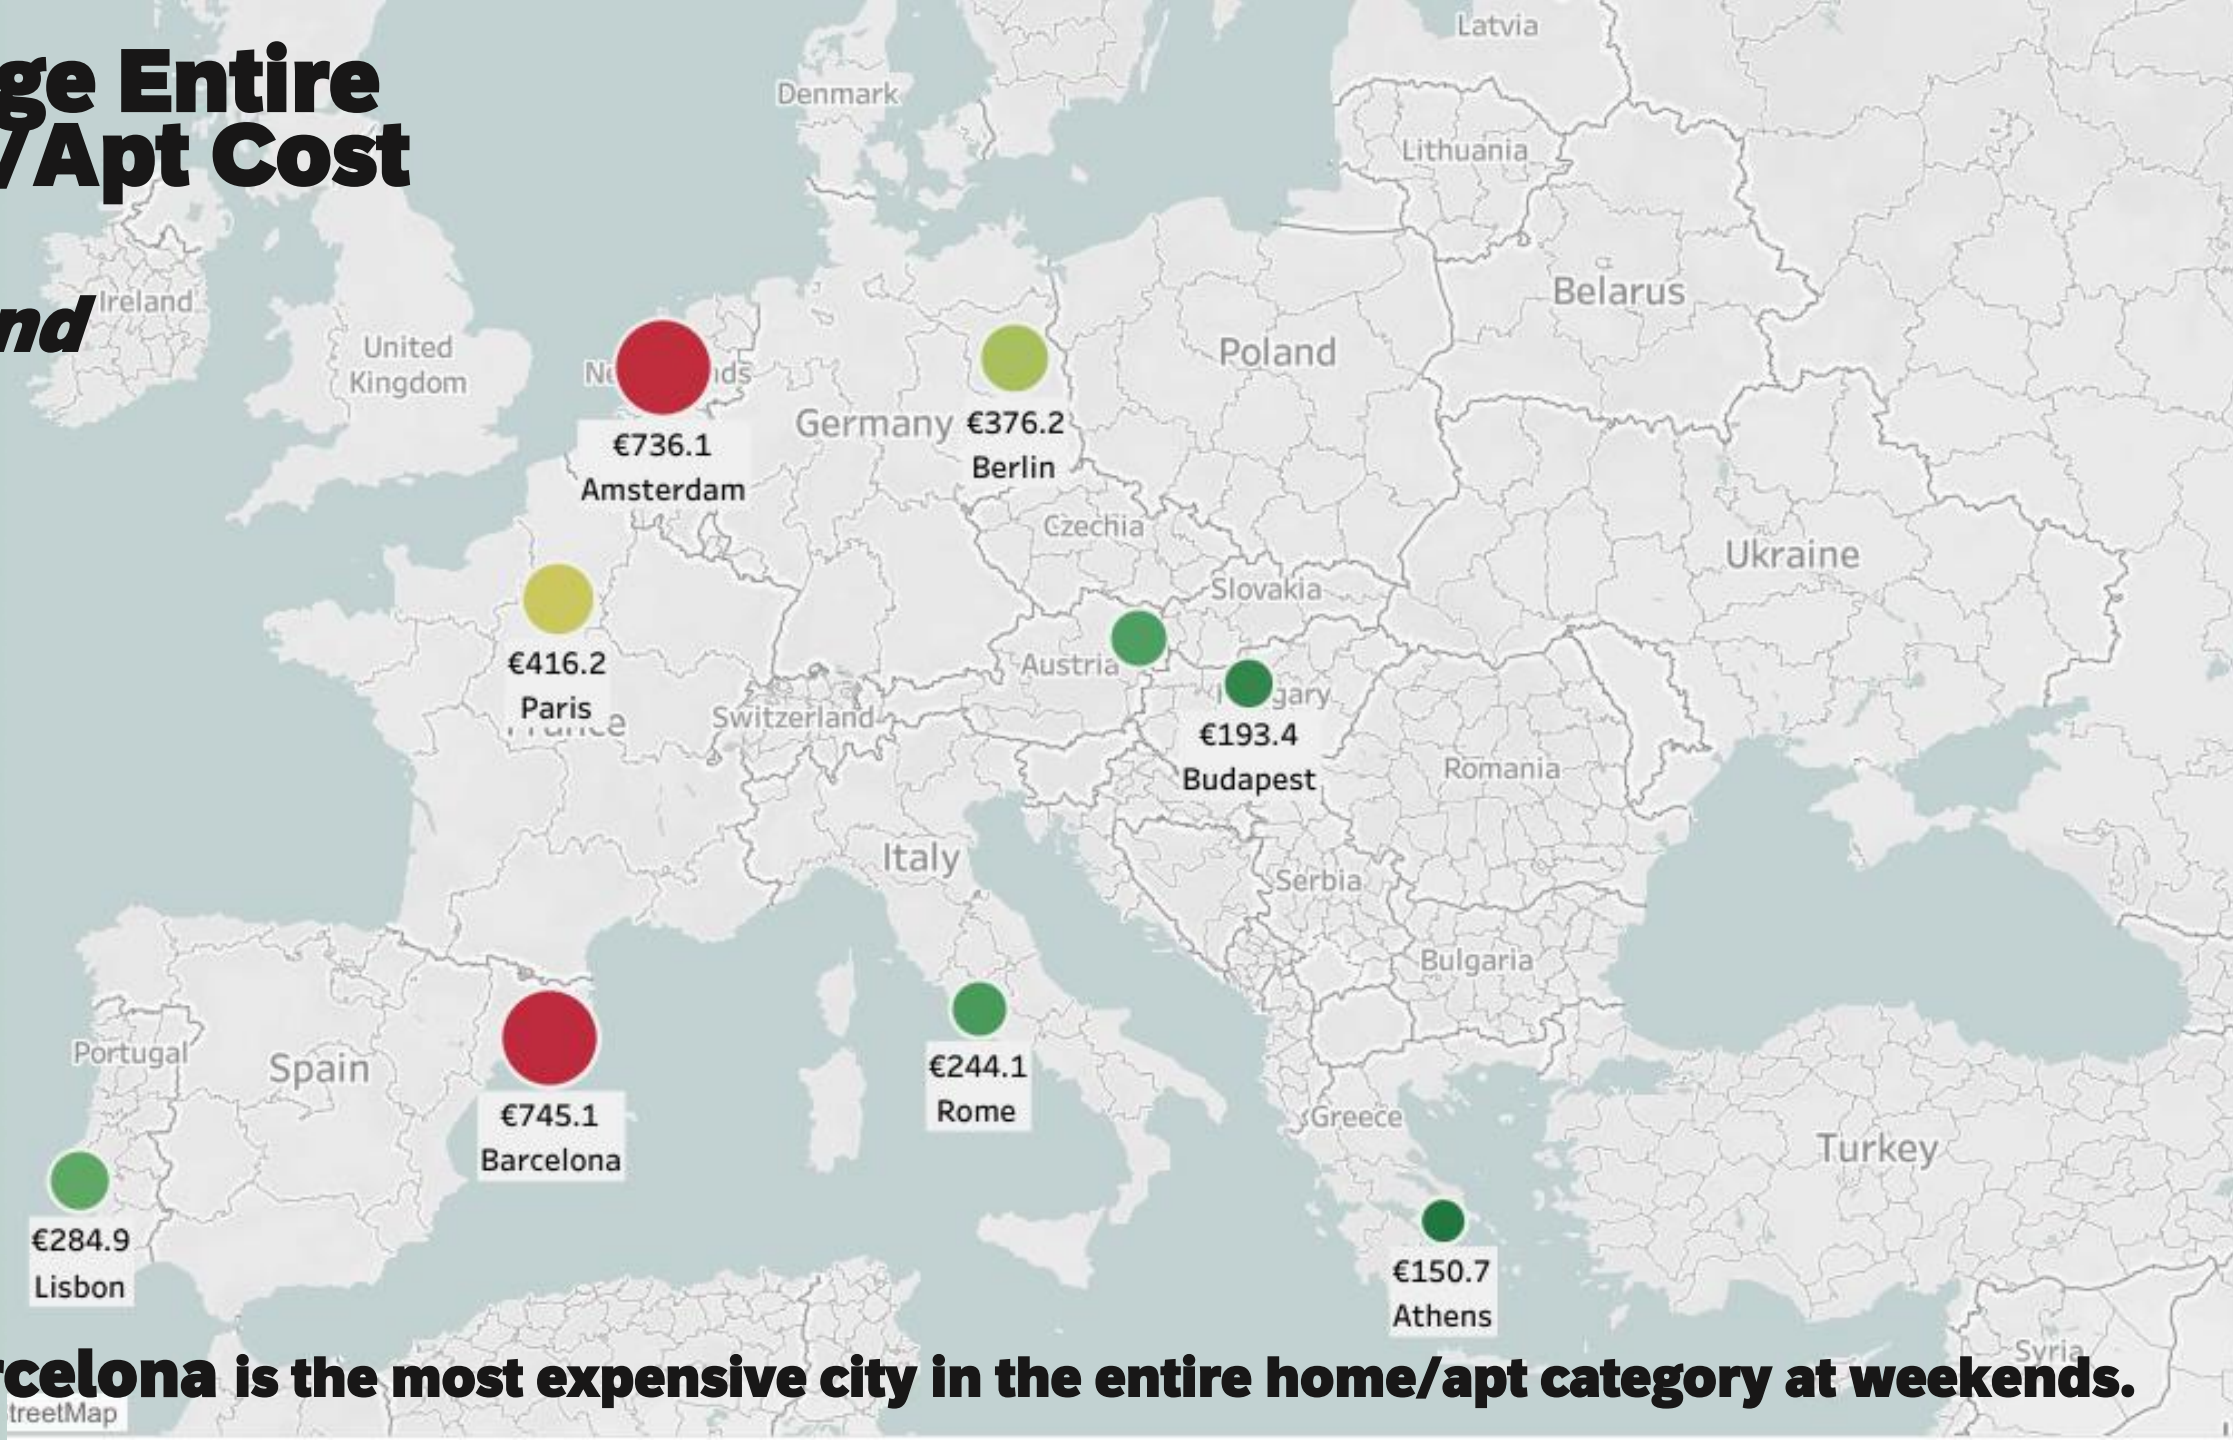

# Average Shared Room Cost (€) *Weekday*

**Athens, Budapest and Rome are relatively cheaper than the others.**

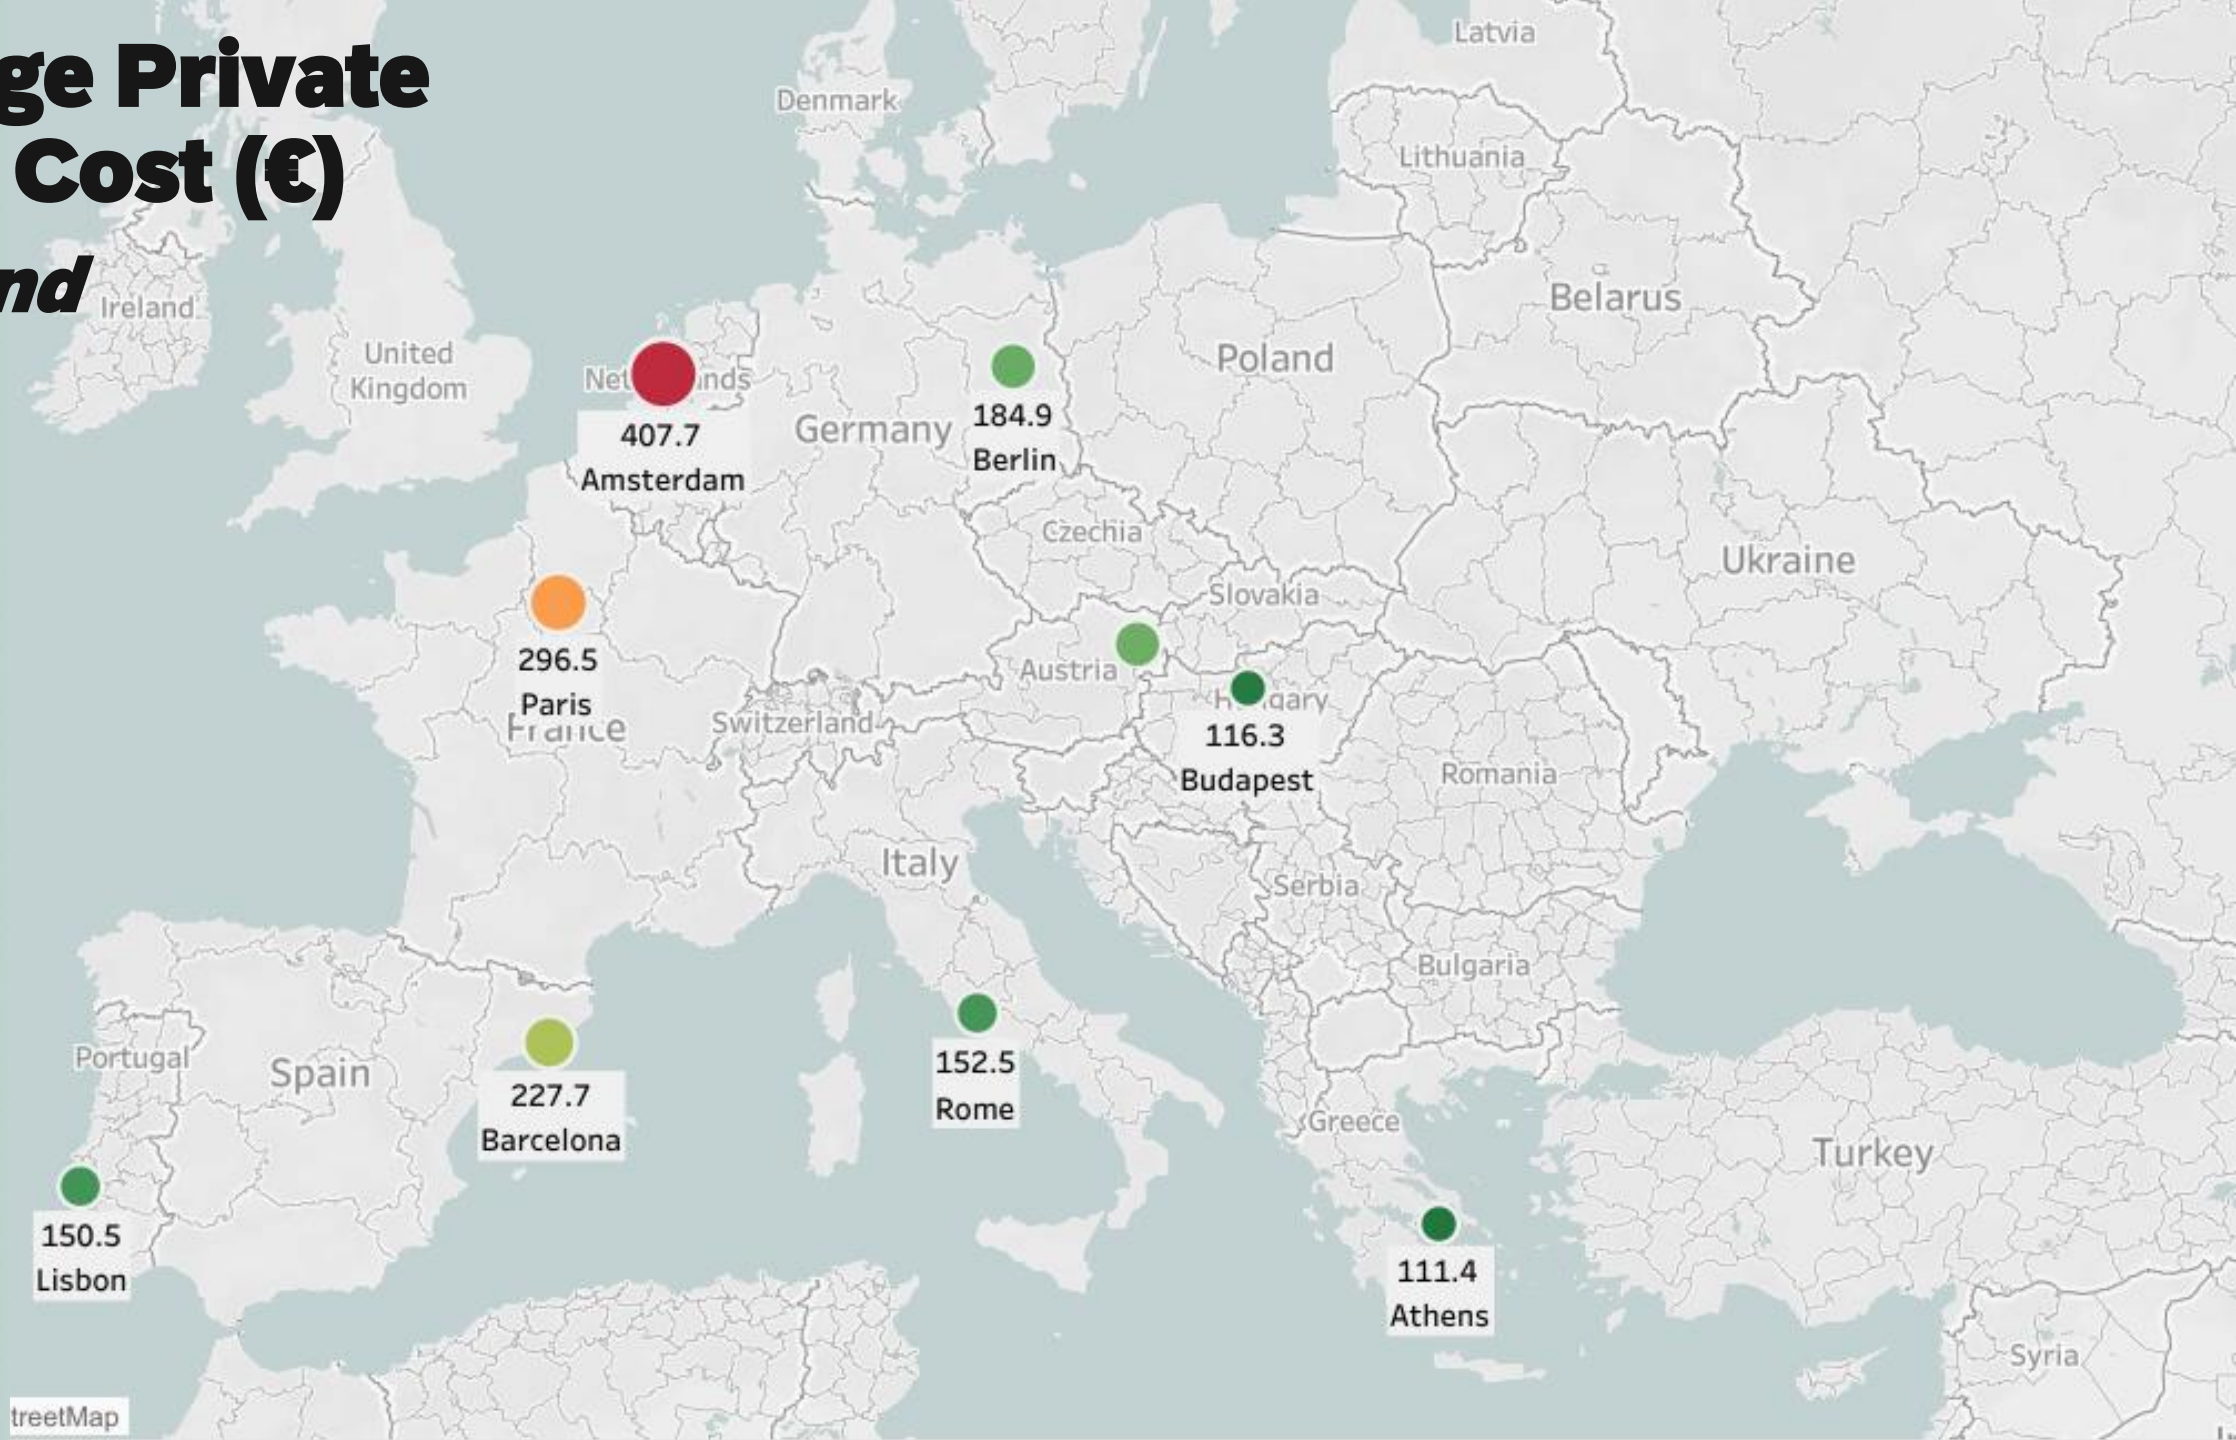

# Average Entire Home/Apt Cost (€) *Weekend*

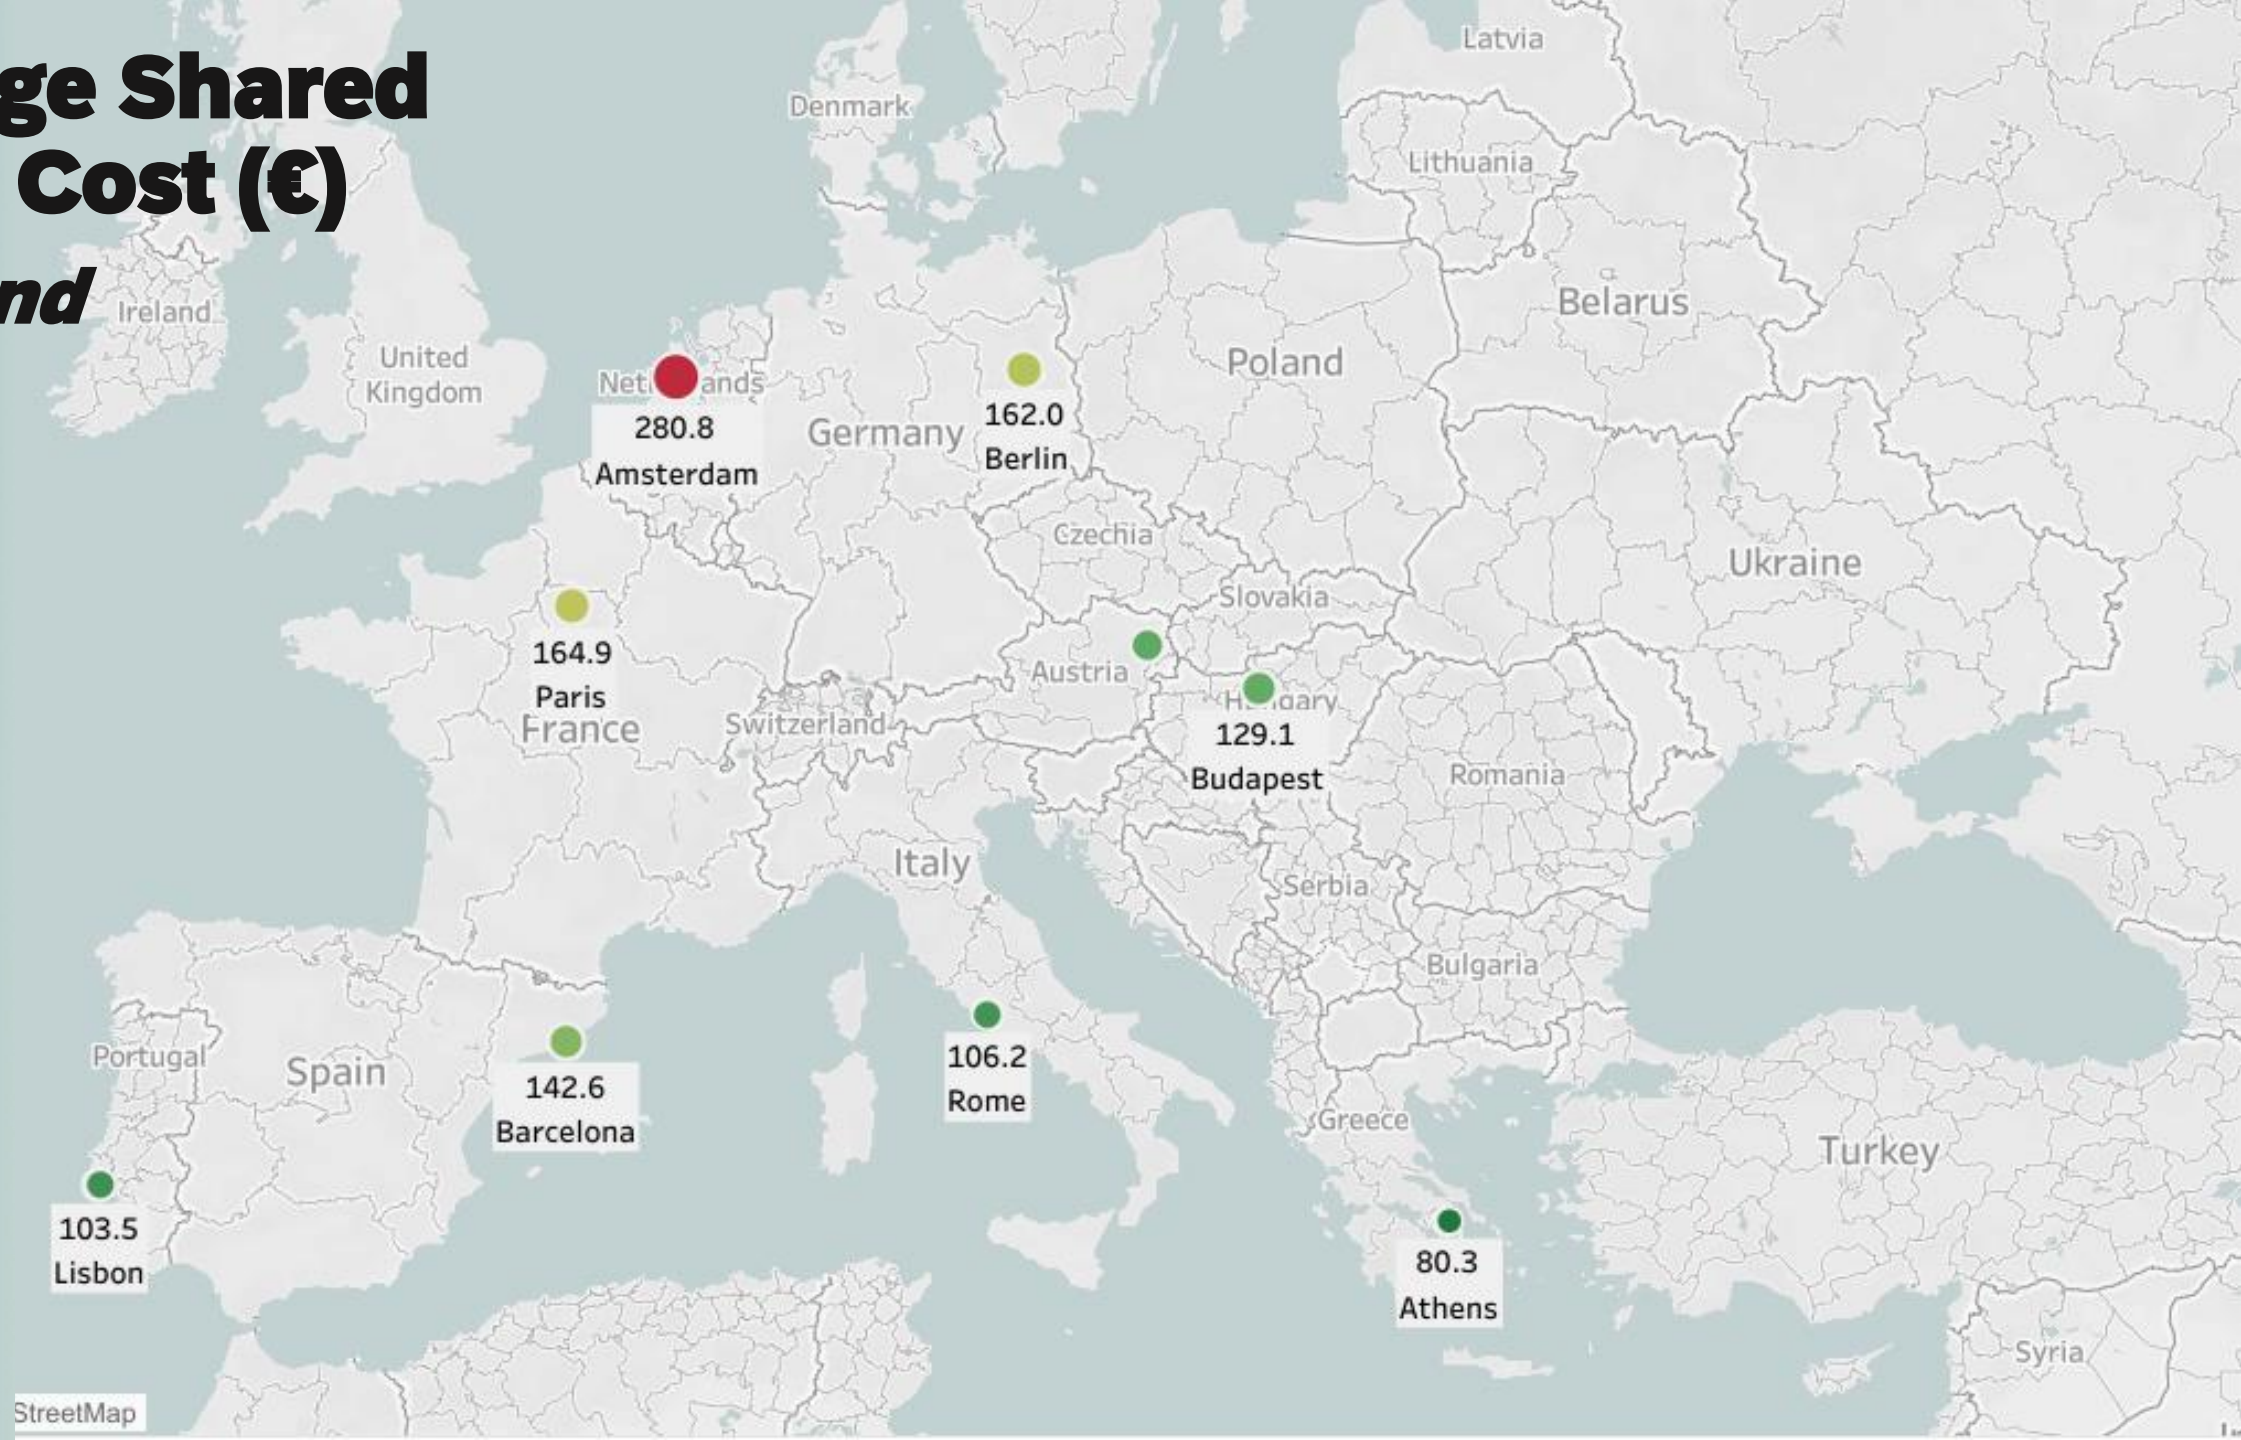

**Barcelona is the most expensive city in the entire home/apt category at weekends.**

# Average Private Room Cost (€) *Weekend*

# Average Shared Room Cost (€) *Weekend*

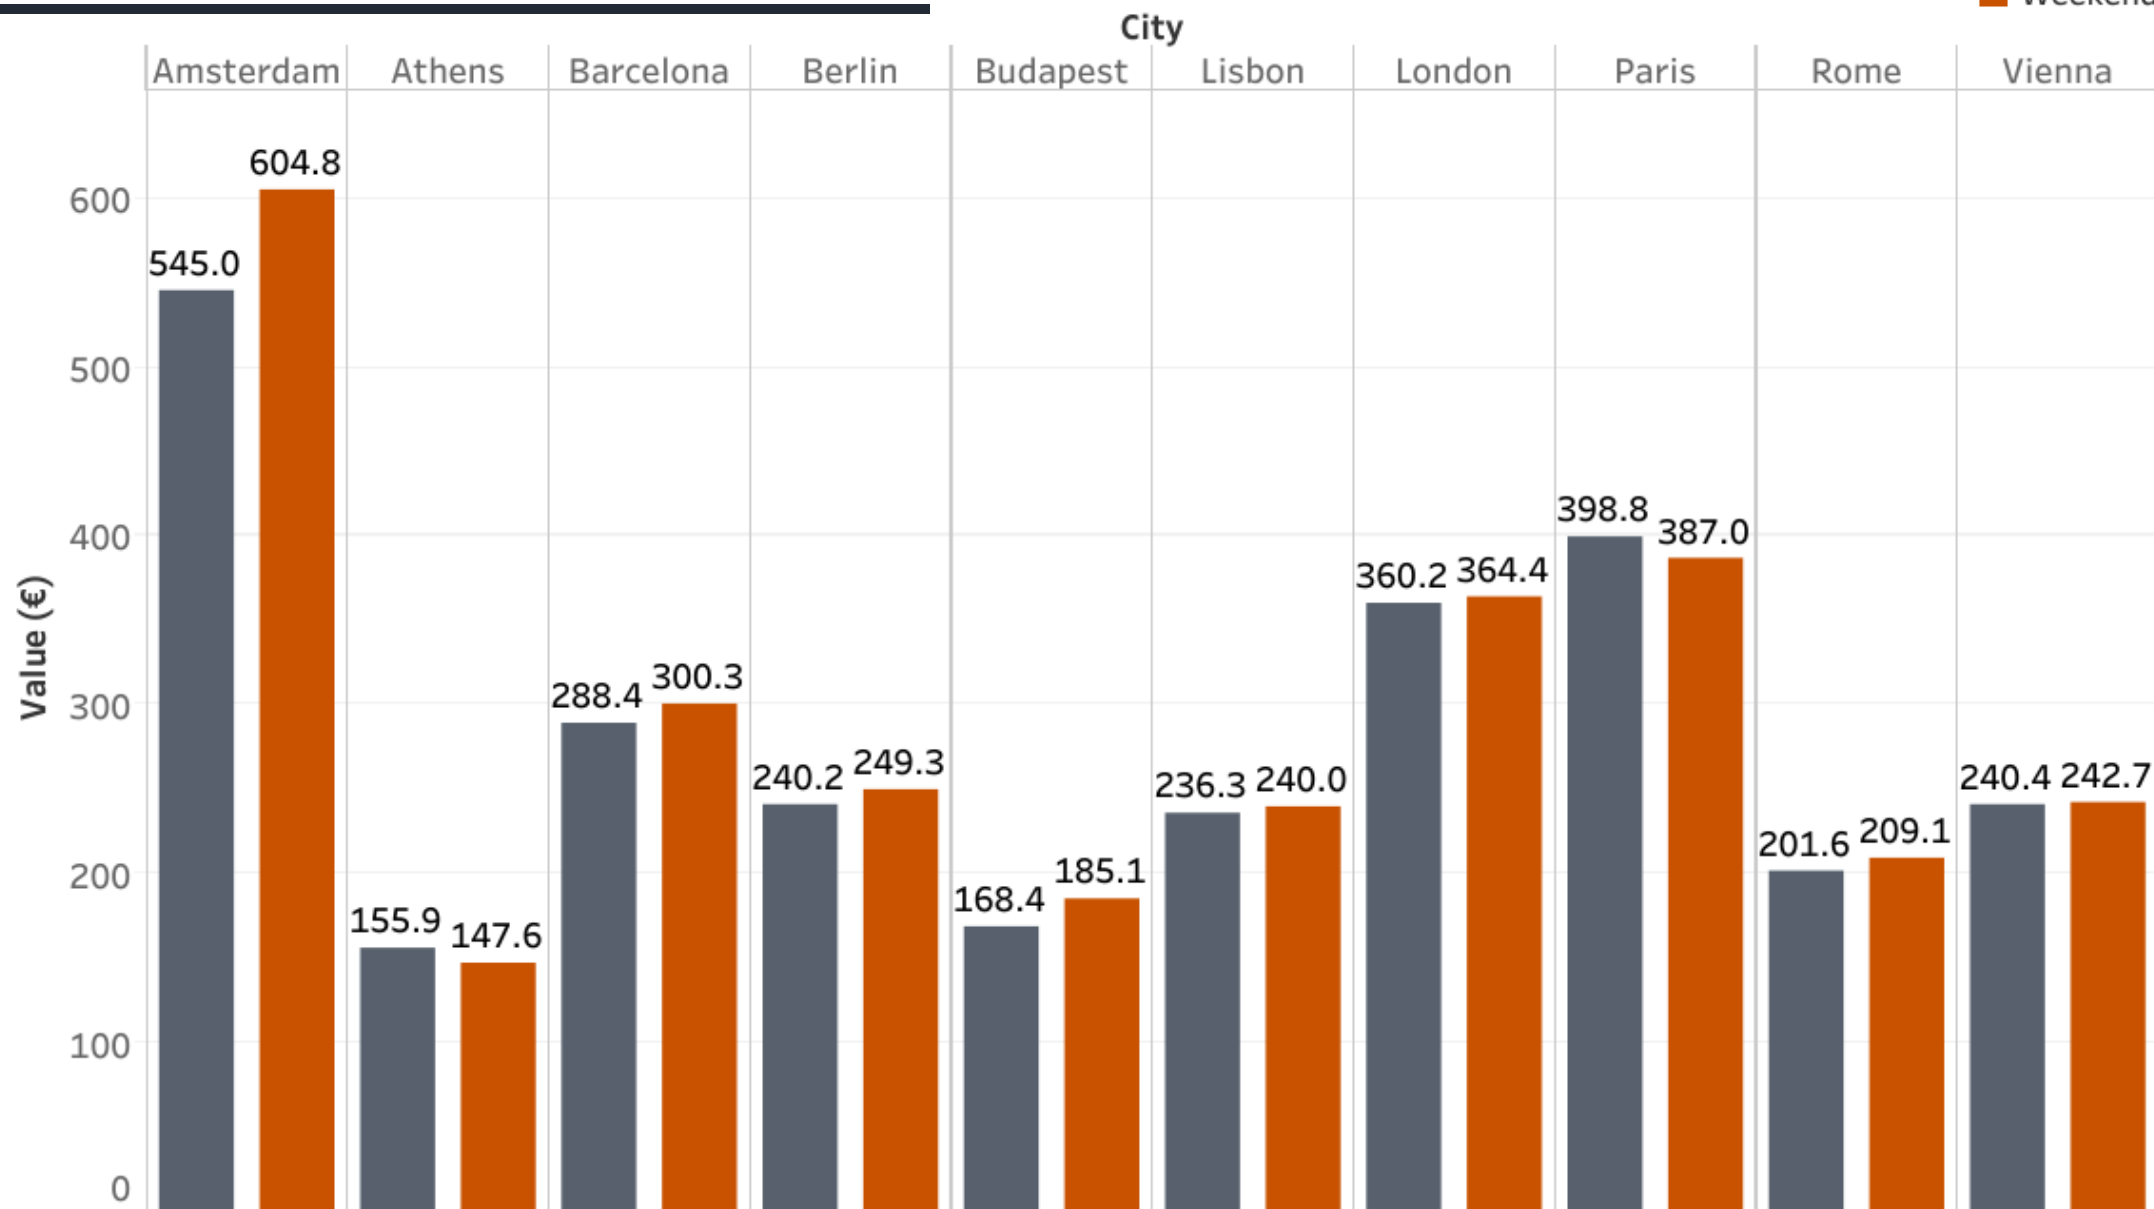

# Average Prices of accommodation

## Measure Names

■ Weekday Avg Price

■ Weekend Avg Price

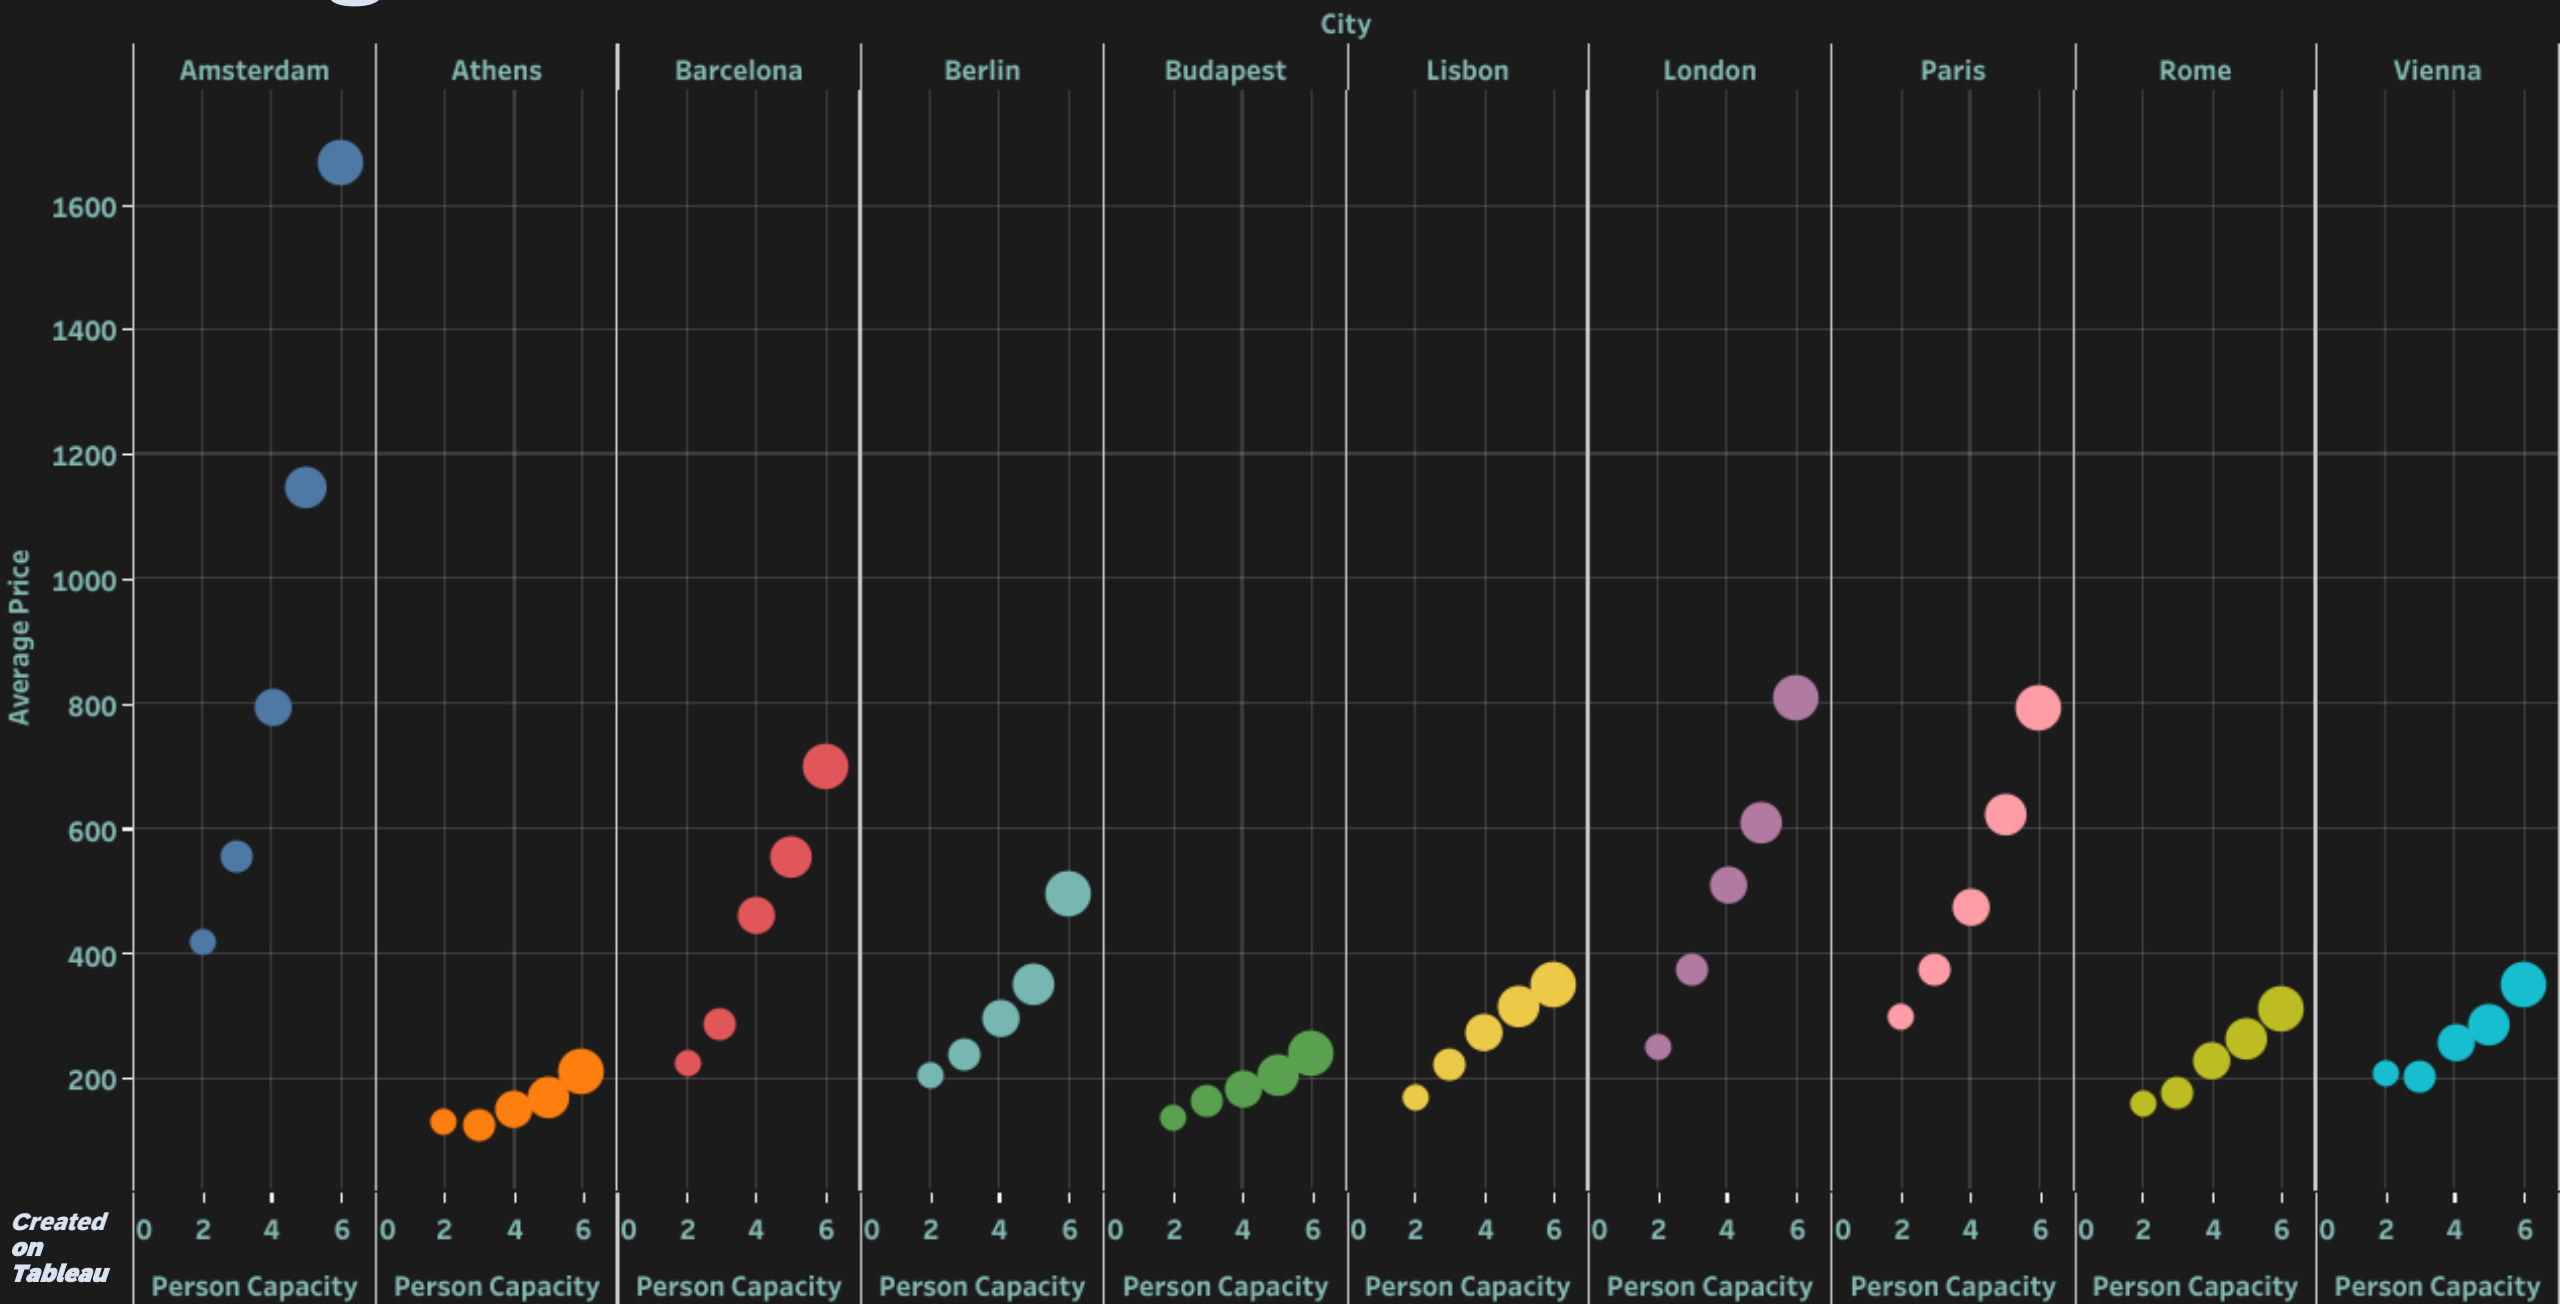

# What is the relationship between person capacity and price in the cities?

---

- **Price gaps between rooms are bigger in Amsterdam.**
- **3 person rooms may be cheaper than 2 person rooms in Athens and Vienna.**
- **Average 2 person room prices in Amsterdam are equal to average 6 person prices in Lisbon.**

# Average Prices through person capacity

# Which cities have the highest number of places?

---

**Highest Number of AirBNB Places: London**

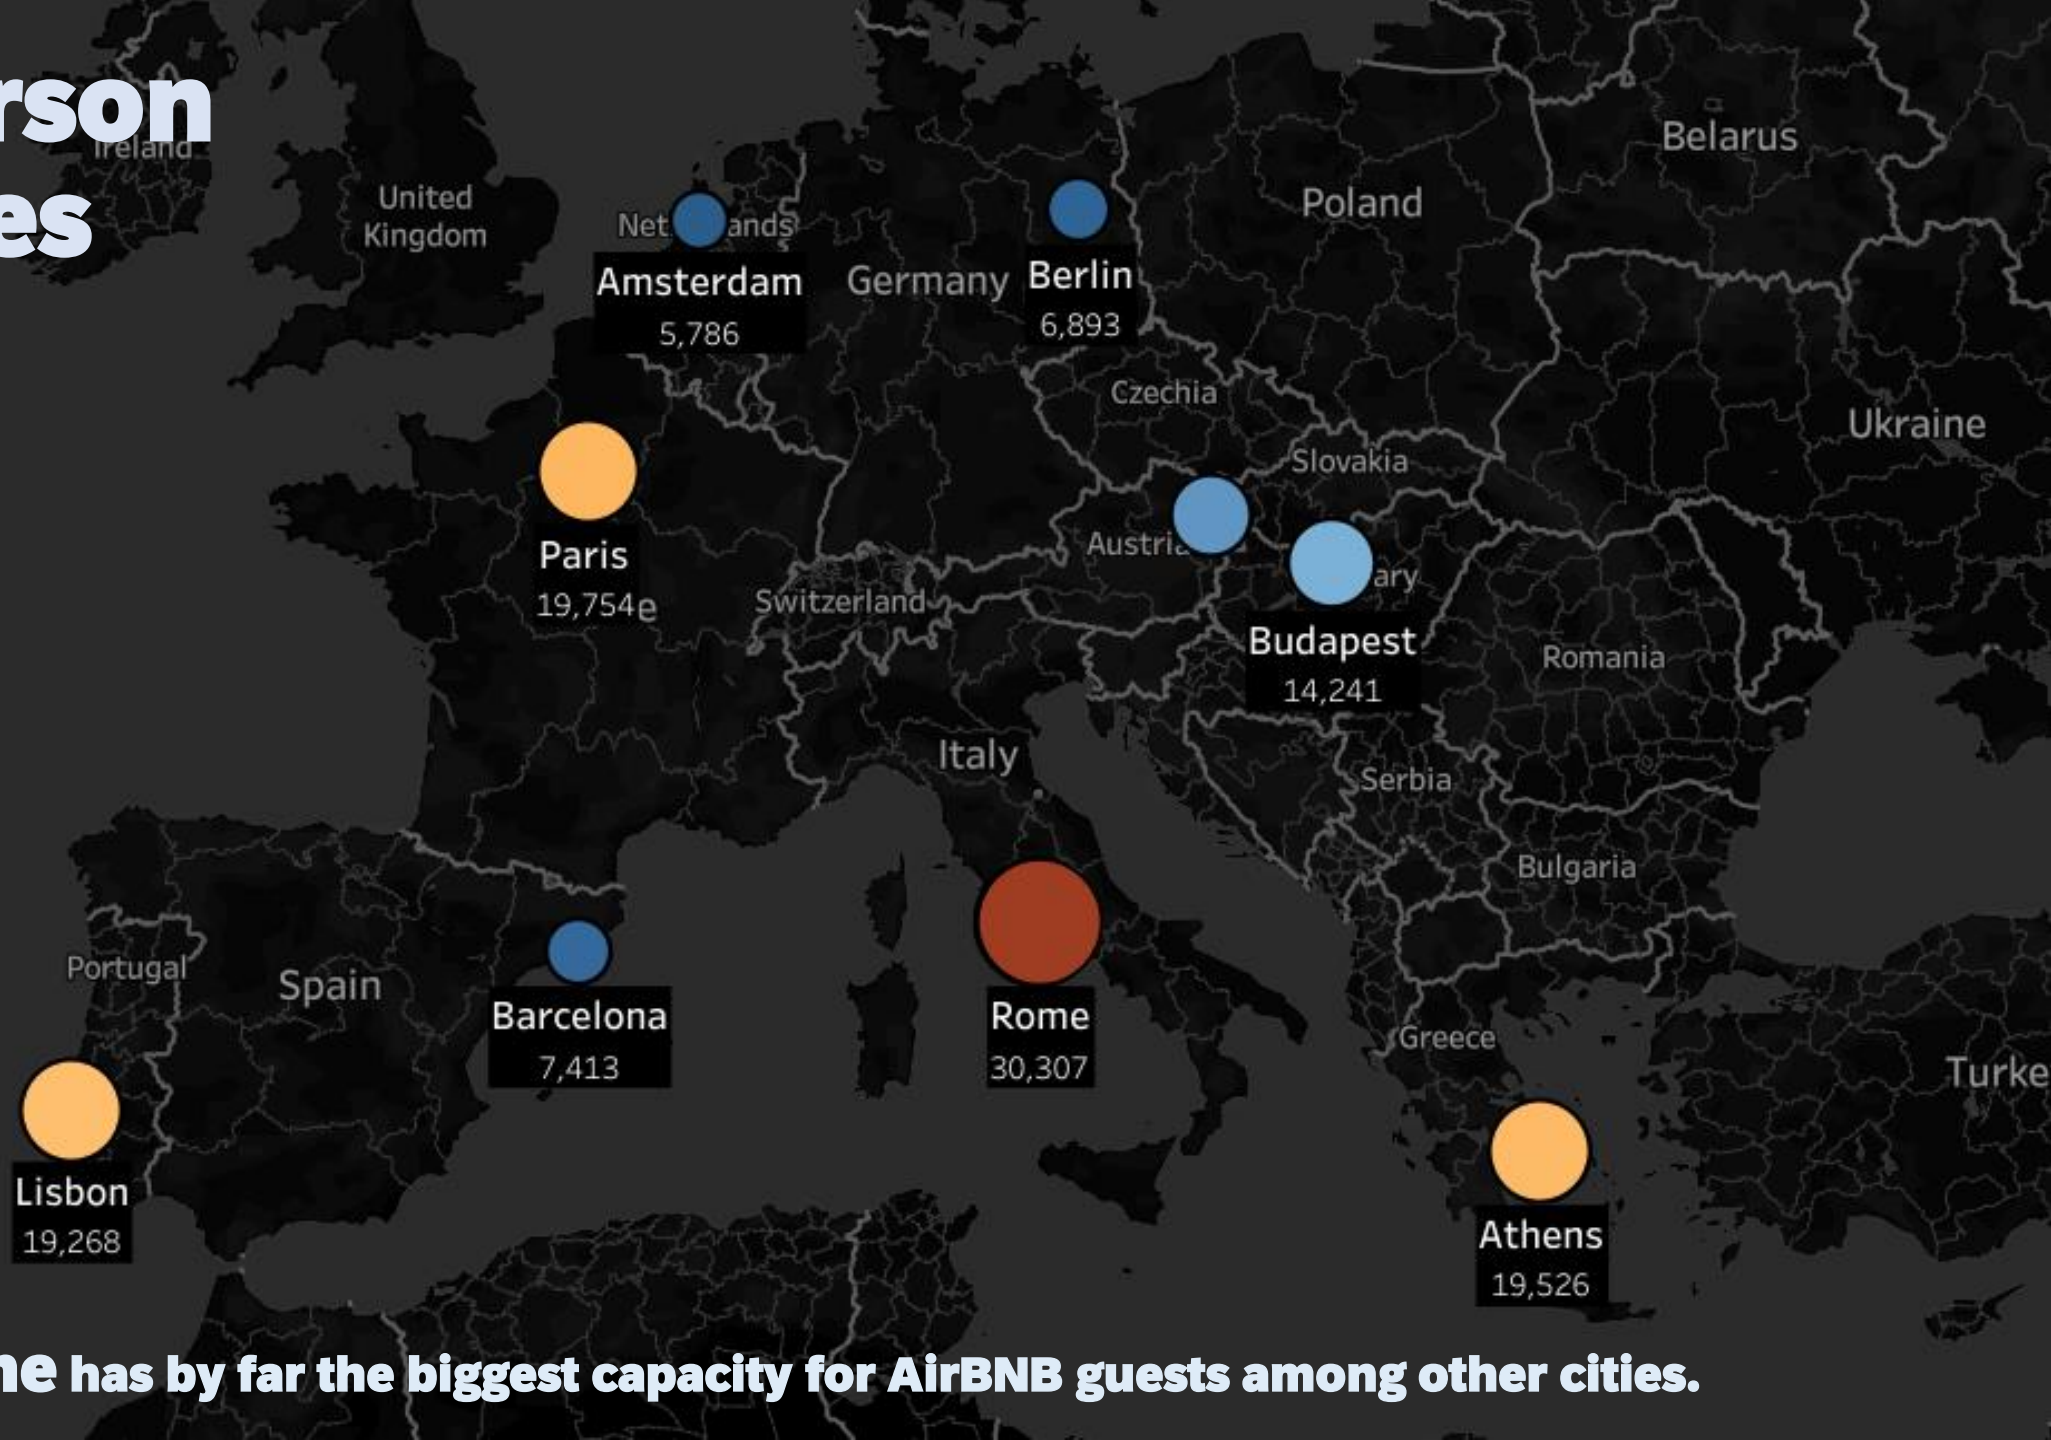

**Lowest Number of AirBNB Places: Amsterdam**

**- Amsterdam** has relatively less AirBNB places among others, on the other hand, has the highest prices.

# Total Person Capacities

in the cities

**Rome has by far the biggest capacity for AirBNB guests among other cities.**

## London

Total Places: 4,614

## Paris

Total Places: 3,130

## Budapest

Total Places:  
2,074

## Vienna

Total Places:  
1,738

## Lisbon

Total Places: 2,857

## Rome

Total Places: 4,492

## Barcelona

Total Places:  
1,555

## Berlin

Total Places:  
1,284

## Athens

Total Places: 2,653

## Amsterdam

Total Places: 1,103

# Total AirBNB Places to Stay

# AirBNB accommodation types

# Highest rated accommodation types

- Shared room
- Entire home/apt
- Private room

# What is the relationship between subway distance and price?

- **AirBNB accommodation in Paris, Athens, Barcelona and Vienna is mostly 0-1 km from metro.**
- **In Lisbon, the distance from metro might be a problem.**
- **Except Amsterdam and Berlin, accommodation places which have the highest prices are mostly 1 bedroom-rooms and close to metro station.**

# Metro Distance – Bedroom Count – Price Graph

London

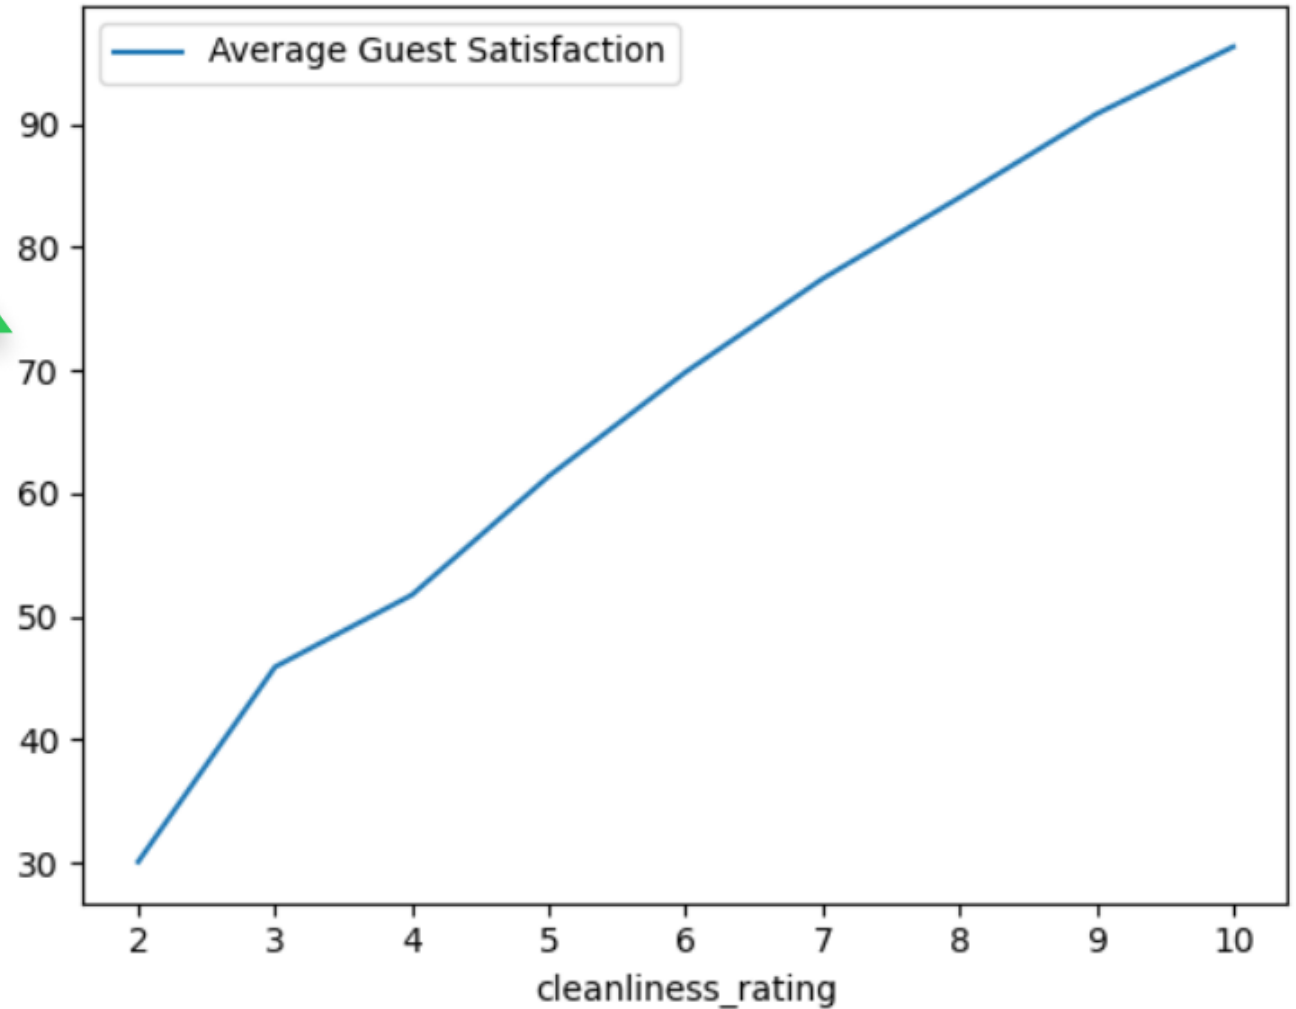

# 4 – CORRELATIONS

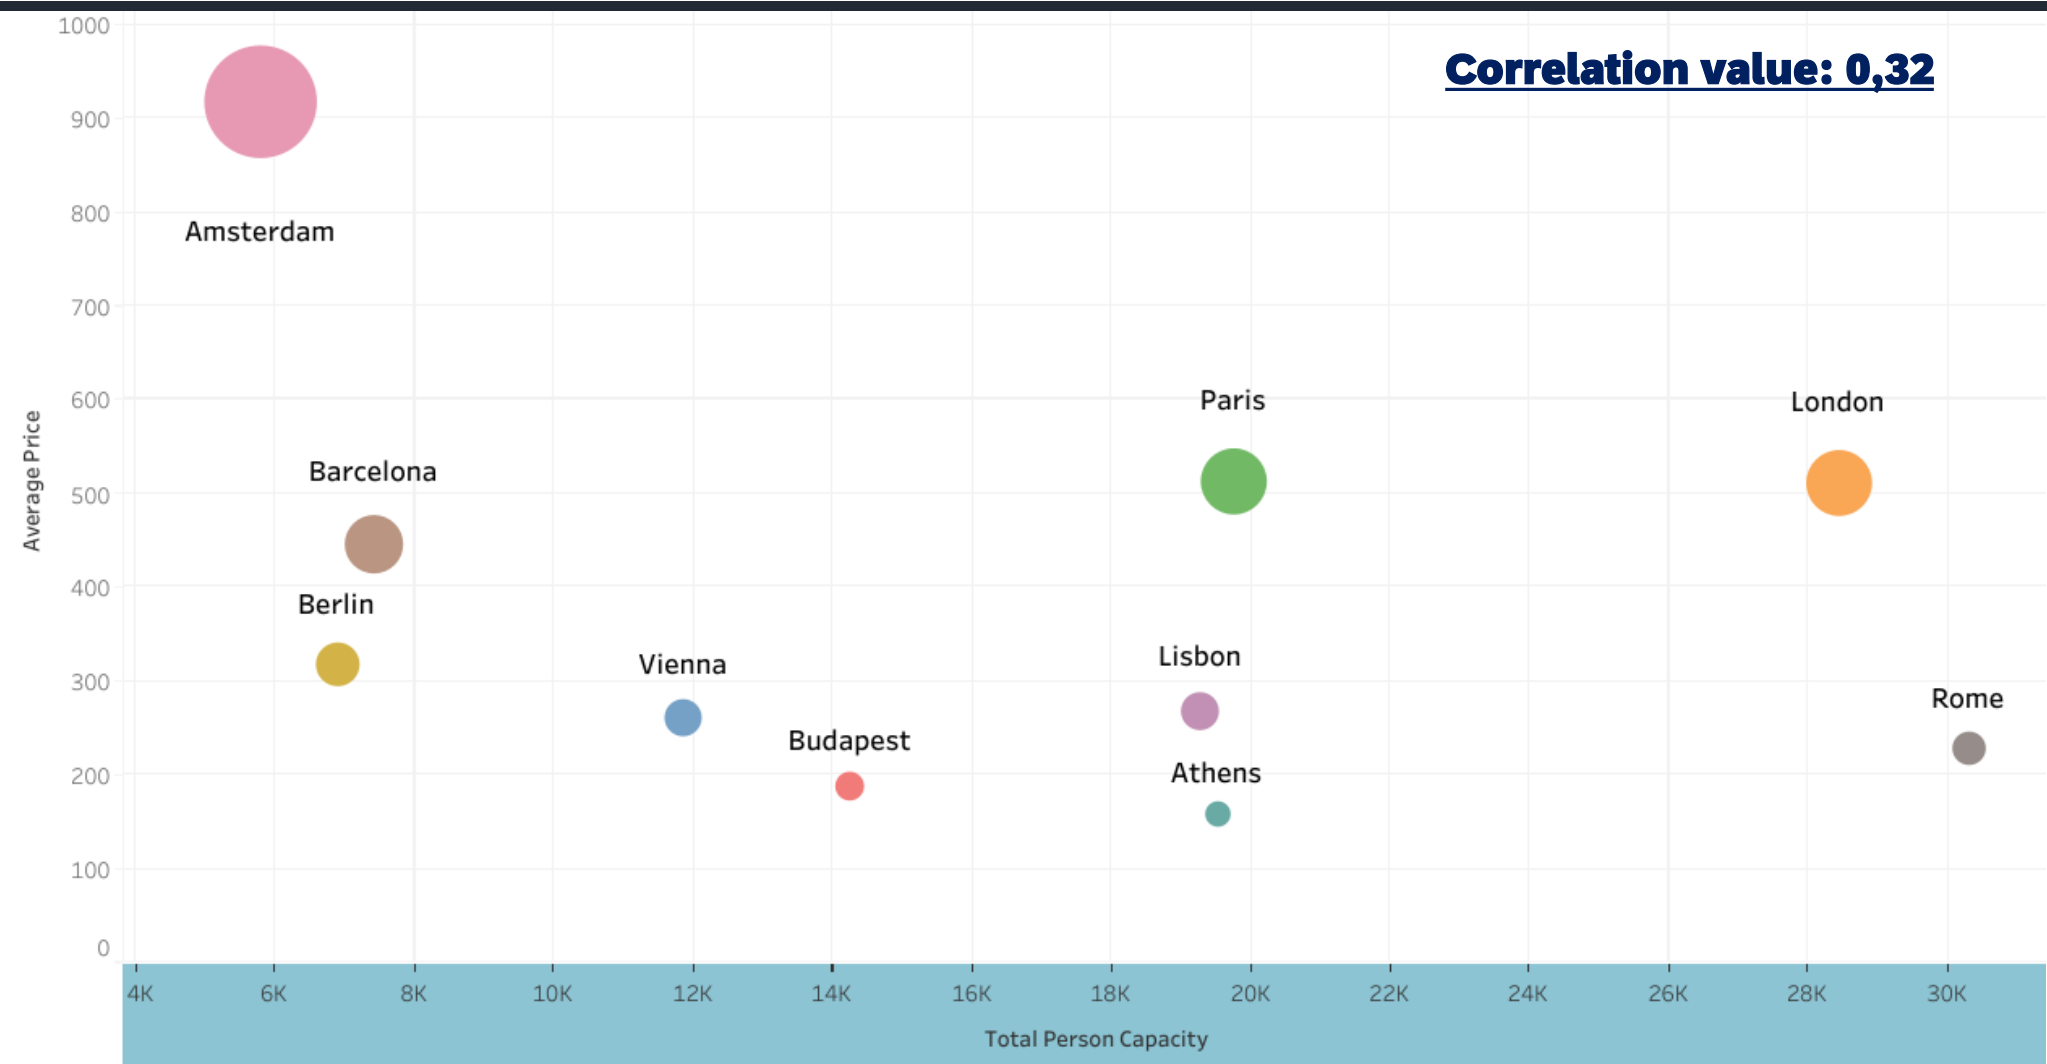

**What is the most effective factor on guest satisfaction?**

## **Cleanliness**

**Is the most important factor for the customer while evaluating their experiences.**

# What is the relationship between total person capacity and average prices?

**There is moderate correlation between total AirBNB guest capacity in a city and the prices.**

# 5 – RECOMMENDATIONS

---

- **Explore AirBNB business opportunities in Amsterdam. It may be a good idea to invest AirBNB places in Amsterdam, as the prices are relatively high and the quantity of AirBNB places is relatively low.**
- **Consider adjusting pricing strategy to increase revenue without sacrificing sales volume.**
- **Keep an eye on cleanliness standards of the AirBNB place, because it's strongly correlated to the overall satisfaction of the guest.**
- **Consider metro distance factor if it's been decided to start a business with AirBNB.**
- **Quantity of entire home options in Barcelona and private room options in Budapest are relatively low. Increasing investments in these places is one of my recommendations, based on my analysis on this data.**

# 6 – CONCLUSION

---

**In conclusion,**

- **This analysis of the AirBNB data for has provided valuable insights into travelling trends and an option of submitting choices according to the budgets of the customers.**
- **Also these findings can lead the business owners to adjust their pricing strategy in order to become more competitive in the market.**

**While this analysis has some limitations, including the availability and quality of the data, i believe that these recommendations provide a strong starting point for further exploration and improvement.**
